22-R067	Andrew Martin	1. Any and all NON PUBLIC damage assessments and incident reports and reports of investigation relating or referring to a widely known cyberattack that became public in December 2020 and was often referred to as the Solarwinds hack. For reference, a Dec. 13 emergency directive from CISA on the incident specifically mentions Solarwind Orion products. Such reports may have been filed to CISA and/or the US Computer Emergency Readiness Team, the Office of Management and Budget, or Congress. 2. Cost assessments associated with the Solarwinds hack. The records should includespreadsheets or a similar document itemizing the funds the agency has spent to date spent to respond to the breach. 3. Any and all after-action reports and official agency timelines mentioning or referring to the source of the attack, the response by the agency to the attack and lessons learned. 4. Any and all talking points the agency has prepared relating or referring to the Solarwinds hack. INSTRUCTIONS REGARDING SEARCH 1. Request for Public Records: Please search for any records even if they are already publicly available. 2. Request for Electronic and Paper/Manual Searches: We request that searches of all electronic and paper/manual indices, filing systems, and locations for any and all records relating or referring to the subject of pur request be conducted. We further request that the agencies conduct a search of its "soft files" as well as files in its locked cabinets. 3. Request regarding Photographs and other Visual Materials: We request that any photographs or other visual materials responsive to our request be released to us in their original or comparable forms, quality, and resolution. For example, if a photograph was taken digitally, or if the agencies maintains a photograph digitally, we request disclosure of the original digital image file, not a reduced resolution version of that image file nor a printout and scan of that image file. Likewise, if a photograph was originally taken as a color photograph, we request disclosure of that photograph as a color image, not a black and white image. Please contact us for any clarification on this point. 4. Request for Duplicate Pages: we request disclosure of any and all supposedly "duplicate" pages. Scholars analyze records not only for the information available on any given page, but also for the relationships between that information and information on pages surrounding it. As such, though certain pages may have been previously released to us, the existence of those pages within new context renders them functionally new pages. As such, the only way to properly analyze released information is to analyze that information within its proper context. Therefore, we request disclosure of all "duplicate" pages. 5. Request to Search Emails: Please search for emails relating to the subject matter of our request. 6. Request for Search of Records Transferred to Other Agencies:we request that in conducting its search, the agencies disclose releasable records even if they are available publicly through other sources outside the agencies, such as NARA.
